## **DETAILED ACTION**

### ***Acknowledgment***

1. The amendment filed on 9/21/2007 has been entered.

### ***Allowable Subject Matter***

2. Claims 1-4 and 6-8 are allowed.
3. The following is an examiner's statement of reasons for allowance.

The prior art does not teach the power system as recited in claim 1, which includes a step transmission, a main motor and an auxiliary motor, which are electrically connected with a power battery and an entire vehicle controller. The power system work automatically, when a vehicle is in low-speed running operation condition, the system works in a pure electrical driving mode in which the internal combustion engine does not work, and only the main motor drives the drive shaft, or the system works in a series driving mode in which the internal combustion engine only drives the auxiliary motor that generates electric power, and the generated electric power is transmitted to the main motor via the power battery to drive the drive shaft. When the vehicle is in full-accelerating operation condition, the system works in a parallel driving mode in which both the internal combustion engine and the main motor drive the vehicle simultaneously. When the vehicle is in braking and decelerating operation condition the system works in an energy recovery mode in which the main motor is controlled to brake and generate electric power and the power battery is recharged. When the

vehicle is during transmission shifting, the system works in auxiliary-driving mode in which the main motor drives the vehicle auxiliary during shifting. When the vehicle is in idling stop operation condition, the system works in an idling stop mode in which the internal combustion engine stops working and when the vehicle is in normal driving operation condition, the system works in normal running mode in which the internal combustion engine drives the vehicle independently. This recitation, in combination with the rest of the recited elements, clearly defines over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
